

Simple text

**brenda Level 1**

**brenda Level 2**

**brenda Level 3**

**brenda Level 4**

**brenda Level 5**

**brenda Level 6**

This is a sentence with a bold and purple word, one in italic, and one with underline. And finally [a link](#).

**An orange bold span with margins.**

Below is a unordered list:

- First item
- Second item
- With a sub unordered list:
  - Sub First **bolded** item
  - Sub Second underlined item
  - With a sub sub unordered list:
    - **Sub Sub First item**
    - **Sub Sub Second item**
- With a sub order list:
  1. Sub Item 1
  2. Sub Item 2
  3. With a sub sub ordered list
    1. Sub Sub Item 1
    2. Sub Sub Item 2

**This sentence is surrendered by BR**

**A first level ordered list with type "I":**

- I. Item 1**
- II. Item 2**
- III. Item 3**

**Text in bold. This is a red span**

**<HR> with the default style:**

**Below, another <HR> but with different style: left=120, width=300, color='red', margin=[0,20,0,20], thickness=2**

Region	Result Q1	Result Q2
Americas	+3%	+6%
Europe	+3.9%	+5%
Asia	+1.5%	+0.9%

Header Column 1	Header Column 2
Value Column 1	Value Column 2

Col A	Col B	Col C	Col D
Cell A1	Cell B1 & B2	Cell C1	Cell D1 & D2
Cell A2		Cell C2	

Cell A3	Cell B3 & C3	Cell D3
Cell A4 & A5 & B4 & B5 & C4 & C5		Cell D4
		Cell D5

Table with widths=[100,"*", "auto"] and heights=40 using "data-pdfmake" attribute		
Cell1	Cell2	Cell3

Cell with red background	Cell	Cell with red borders
--------------------------	------	-----------------------

Table autosized based on style "height" and "width" using "tableAutoSize:true" option:

height:100px / width:250px	height:100px / width:'auto'
Here "<td width="100">" will use 250px for the width because we have to use the largest col's width	height:200px / width:'auto'

Change the table's layout (header with red border, body with blue border):

Header A	Header B
A1	B1
A2	B2
A3	B3

An image:

**Bold italic centered text**

text "bold" text "bold & italic" text "bold & italic & red" text "bold & italic" text "bold"

Below we preserve the spaces:

this is just an example.

And support for **FONT** tag.

**brenda**
